SUMMARY

Electronics and Communication Engineering undergraduate skilled in leveraging software engineering paradigms to build scalable solutions. Proficient in full-stack web development, data structures, and object-oriented programming alongside a robust foundation in hardware architecture and microcontrollers.

Demonstrated capability in driving technical engineering pipelines, optimizing hardware circuit infrastructure, and managing cross-functional student teams and operations within competitive high-stakes environments.

EDUCATION

Ajay Kumar Garg Engineering College Ghaziabad, India
BTech. in Electronics and Communication Engineering | GPA: 7.59 2023 – 2027

- **Relevant Coursework:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPS), VLSI Design, Embedded Systems, Digital Electronics, Network Analysis & Synthesis, Electronic Devices and Circuits, Database Management Systems (DBMS), Operating Systems, Computer Networks.

Delhi Public School Ghaziabad Ghaziabad, India
All India Senior School Certificate Examination (Class XII) | Percentage: 81.2% 2021 – 2023

- Completed core coursework across Science and Mathematics domains under the central board matrix.

Delhi Public School Ghaziabad Ghaziabad, India
Secondary School Examination (Class X) | Percentage: 95.8% 2009 – 2021

- Attained top scholastic honors with distinction across foundational science, logical reasoning, and analytics.

PROJECTS

AyuTrace | *React.js, Node.js, Express.js, SQL, Tailwind CSS, Blockchain, Git* Oct 2025

- Architected a blockchain-powered traceability platform using Node.js, Express.js, and SQL to securely automate and log end-to-end supply chain workflows for Ayurvedic herbs.
- Designed and deployed a highly responsive, intuitive user interface leveraging React.js and Tailwind CSS, optimizing frontend rendering speeds and cross-device accessibility.

Project Quest | *Arduino UNO, Embedded C++, Circuit Optimization, Hardware Sensors* Jan 2025

- Engineered an automated water level monitoring system using an Arduino Uno, interfacing physical depth sensors to execute real-time detection loops and alert signals.
- Programmed low-level microcontroller operations in optimized Embedded C++ to maintain stable control loops and calibrated circuitry configurations to minimize signal noise.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, Java, SQL (Postgres), HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, MongoDB, FastAPI, Flask, Tailwind CSS, Material-UI, pandas, NumPy, Matplotlib

Electronics & Hardware: VLSI Design, Embedded Systems, Digital Electronics, Analog Electronics, Communication Systems

Tools & Platforms: Git, GitHub, VS Code, Postman, Figma, Docker, TravisCI, Google Cloud Platform, JUnit, WordPress

Soft Skills: Technical Writing, Team Collaboration, Project Management, Leadership, Problem Solving, Event Logistics

ACHIEVEMENTS & LEADERSHIP

National Technical Paper Presentation Contest (SCROLLS) | *1st Position* Oct 2025

- Secured top honors out of nationwide entries within the Management Science domain for research authored on the “Indian Semiconductor Mission”.
- Conducted comprehensive analysis regarding manufacturing ecosystem bottlenecks, policy initiatives, and upcoming fabrication plans in India.

PHOENIX (ECE Society) | *Technical Team Member* 2025 - Present

- Spearhead the technical pipeline, system architecture setups, and core engineering project management launched across the department.

Navadhyay Committee | *Technical Member & Event Strategist* Oct 2024

- Supervised high-stakes backstage workflows, multi-tier execution schedules, and cross-functional personnel logistics for the institutional cultural production.
